Upgrade Your Electrical System

Protect yourself, your family and your home from as little as £400

13 million homes in the UK today are not RCD protected.

50% of fires (21,000) in domestic dwellings were due to an electrical cause

A residual current device or RCD is an electrical wiring device that disconnects a circuit whenever an imbalance is detected between the energized conductor and the return neutral conductor. Such an imbalance is sometimes caused by current leakage through the body of a person who is grounded and accidentally touching the energized part of the circuit. This can result in **lethal** shock.

RCDs are designed to disconnect quick enough to mitigate the harm caused by such shocks and are an essential addition to domestic circuits to ensure a high degree of safety for you and your family.

SPECIAL OFFER: £400 ALL INCLUSIVE

NEW CONSUMER UNIT, INC. ALL ACCESSORIES, FULL FITTING, TESTING & ELECTRICAL CERTIFICATE.

All systems up to 10 circuits. Over 10 circuits may incur additional costs

Typical **Older** Fuse Board

New RCD Consumer Unit

We hold the very latest Qualifications: City & Guilds (2382) 17th Edition IEE Wiring, City & Guilds (2392) Certificate, Logic Certification Domestic Periodic Inspection and Testing Awards.

We are fully insured and all work is guaranteed
