PERSONAL PROFILE

I'm a reliable and practical individual with a background in customer service, logistics, and regulated environments, now focused on building a long-term career in the electrical trade. Over the years, I've developed strong problem-solving skills, attention to detail, and the ability to work under pressure, all of which I bring to my growing hands-on experience. I've carried out electrical repairs and socket replacements in my own home, decorated and maintained property myself, and I enjoy learning by doing. I'm now looking to take that further, working alongside experienced electricians, developing my skills on-site, and contributing to projects with a strong work ethic and willingness to learn.

KEY SKILLS

- Basic electrical tasks: socket replacements, minor domestic repairs
- Self-taught DIY: home decoration, maintenance, and small renovations
- Comfortable with tools and physical work
- Keen to learn from experienced electricians and teams
- Electrical safety awareness and respect for regulations
- Customer service and interpersonal skills
- Problem-solving and analytical mindset
- Adaptability, stamina, and team coordination
