

# Solar PV Technical Manager | **Sunsave**

## About You

Are you a qualified electrician with experience of solar installation interested in developing your management experience and looking for a new challenge? Do you want to play a critical role in building the UK's next market leader in residential solar? Does the idea of helping to tackle the energy crisis *and* the climate crisis by making renewable solar energy mainstream and affordable excite you? If so, read on!

## About the Role

If you are eager to learn and are not afraid to dive straight into new challenges, this role is a great opportunity to be part of something innovative and new entering the UK solar space. As a **Technical Manager** at Sunsave, you will be responsible for overseeing the delivery of residential solar installations through our installation partners. The skills you've developed in solar installation will be critical to drive installation standards, develop new quality assurance processes and provide technical expertise to the rest of the team. You'll be spending some of your time on site conducting quality assurance checks and they'll also be opportunities to get stuck in with your tools if it is something you want to do.

As a Technical Manager, you will:

- Be a subject matter expert on solar and battery storage installation, reviewing and signing off solar designs and answering challenging technical queries from the sales team.
- Manage our large and diverse range of installation partners to deliver a great experience for both our partners and customers (higher availability, faster speeds, etc.).
- Ensure that installations are completed in line with MCS regulations as well as our own stringent internal quality standards (we will provide ongoing training and may require some onsite work).
- Work with the Product and Engineering teams to design and build tools to assist with the surveying and installation of solar PV and battery storage.
- Ensure that our internal quality management systems are kept accurate and up to date.
- Be willing to travel to installations within your region as required (not the majority of the job) and occasionally to London (Sunsave's HQ) for workshops, team events, planning exercises, etc.

## Knowledge, Skills & Experience

### Essential Requirements

- Minimum of 3 years electrical experience
- Knowledge of, and experience in Solar PV installations
- Knowledge of, and experience in Battery installations
- Excellent knowledge of wiring regulations and certifications
- NVQ Level 3 and fully qualified AM2 electrical qualifications (or equivalent)
- Inspection and testing qualifications (City & Guilds 2391 or 2394/5 or equivalent)
- 18th Edition City & Guilds (or equivalent)
- Ability to work with a diverse range of team members, communicate effectively, and work independently where needed
- Full UK driving licence

Desirable (upskill training can be offered)

- Field Manager experience
- Residential solar PV experience
- Excellent knowledge of MCS regulations and certification
- Experience with solar design software (e.g. one of OpenSolar, PVSol, PVSyst, etc)
- 2399-13 or equivalent (e.g. BPEC)
- HV/AP 15 – SAP, or equivalent

If you don't feel your skills/experience fulfil all of the brief above, or you feel you're over-qualified for the role, but would be a great fit for us, please apply! We're a flexible employer looking for the right person, rather than the perfect CV.

## About Us

We're Sunsave and our mission is to increase access to green energy by offering solar on a subscription basis with no upfront cost. We want to empower customers by helping them reduce their electricity bills from day one saving tens of thousands over the lifetime of our product, and all while contributing to a cleaner, greener Britain. (Which we think is a pretty cool aim).

We're a small, well-funded and fast-growing start up with a team of experienced industry and sector experts. We're tech-driven and very ambitious - aspiring to become THE UK market leader in the solar space. However, we're committed to doing it right. We place our customers at the heart of everything we do and strive to deliver excellence at every step of the process, from procurement to installation, and beyond.

By joining our team at this early stage the opportunities for progression, growth and career development are massive, and the potential here at Sunsave is huge. However, we know that in order to achieve our ambitious goals, we need a brilliant team. We're dedicated to building a bright and diverse business, valuing different perspectives and approaches and knowing that we'll achieve far more together than we ever could alone.

We appreciate that building a truly diverse team means being flexible. We all have different situations and we're committed to helping everyone have a voice at the table. We support a hybrid/flexible approach, with a mixture of time spent on site, working from home or at HQ in London.

## What We Offer

-  Competitive compensation package
-  Share in employee equity scheme
-  Ongoing training (to help you stay up to date on changes to technical standards)
-  Private health insurance (including mental health support)
-  Flexible working culture (mix of office, remote, on site)
-  Juno wellbeing monthly benefits
-  Enhanced maternity and paternity benefit
-  Team social events (remote & live)
